

Volunteer For a Brain Scanning Study?

We are seeking healthy volunteers aged 45-85 as control subjects for a study of breathing perception.

We would scan your brain using functional magnetic resonance imaging (fMRI). You would also undertake a walking and a breathing test.

If you

- *have no history of neurological or psychological illness*
- *are not taking any regular pain killers*
- *have no metal implants or cardiac pacemakers*
- *do not suffer any breathing problems*
- *are not claustrophobic*

and would be interested in participating please contact:

Mari Herigstad
Nuffield Department of Anaesthetics
John Radcliffe Hospital, Oxford
Tel: 01865 234544
E-mail: mari.herigstad@nda.ox.ac.uk

You would need to visit on one occasion, taking a total of up to 4 hours.

You would be compensated for your time, and have your travel expenses reimbursed.
